Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter Saxon on September 16, 2004.

The application has been amended as follows:

- Claim 1, last line: the phrase "and the said recording layer are" was replaced with the word "is";
- Claim 1, last line: the word "directions" was replaced with "direction"; and
- Claim 1, last line: the phrase "each other" was replaced with "the saturation magnetization of said recording and switching layers".

Reasons for Allowance

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious the claimed relative saturation magnetization directions.

While the prior art of record disclose saturation magnetizations of the domain wall displacement layer and the recording layer being in opposite directions when exchange coupled at a temperature close to the Curie temperature of the switching layer, the prior art of record fails to disclose or render obvious a magneto-optical

recording medium wherein the saturation magnetization directions of the domain wall displacement layer is in an opposite direction to the saturation magnetizations of *both* the recording and switching layers.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
